

AI Personal Investment Advisor

Intelligent Wealth Management Powered by GenAI & Real-Time Market Agents

The Vision: Automating Financial Intelligence

Bridging the gap between complex market data and personalized human goals.

Personalized Advisory Engine

- **Dynamic User Profiling:** Advice adjusted for risk appetite, income, and specific financial milestones.
- **Real-Time Insights:** Integrated agents fetch live indices for S&P 500, Nasdaq, and Crypto.
- **High-Speed Synthesis:** Utilizing Groq-powered Llama 3 for near-instant portfolio generation.

Core Technical Framework

Expert Prompting

Sophisticated prompt engineering defines the financial expert persona for high-fidelity reasoning.

Agentic Logic

Autonomous tools (yFinance) bridge the gap between LLM static training and live market volatility.

Responsible AI

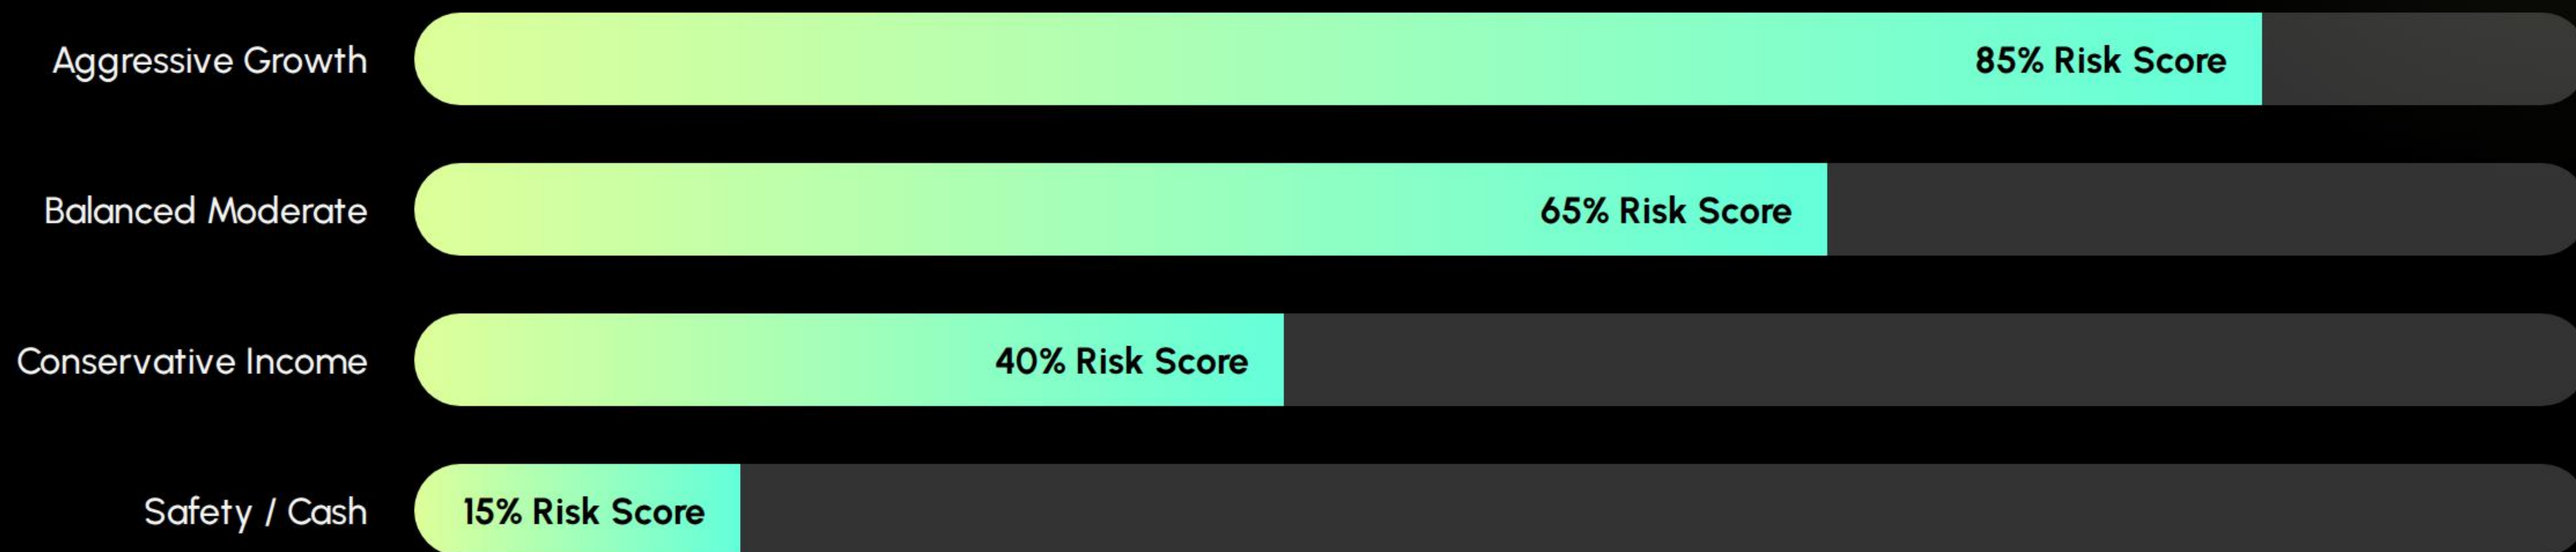

Automated compliance disclaimers ensure safe and ethical financial recommendations.

Rapid UI

Built with Streamlit for a responsive, interactive experience from day one.

Portfolio Risk Simulation

Our engine maps user risk profiles directly to simulated volatility indices.

Next-Gen "What-If" Analysis

Stress-test your financial future. Users can instantly simulate market crashes or bull runs to see real-time portfolio adjustments.

- Scenario-based logic testing
- Instant feedback loops
- Goal viability tracking
